PROFESSIONAL SUMMARY

Customer Success Manager transitioning into AI Product Management, with 5+ years of experience driving renewals, retention, upsells, and expansion for enterprise and mid-market B2B SaaS clients. Passionate about AI and actively exploring how it can solve real customer problems — including experimenting with QBR automation tools and competitive intelligence workflows. Skilled at translating customer pain points into clear product requirements, collaborating cross-functionally with Engineering and Product teams, and delivering measurable business outcomes in fast-growing SaaS environments. Currently completing a Digital Product Management program at George Brown College (2026).

SKILLS

Customer Success & Revenue Growth: Expertise in managing the full customer lifecycle — onboarding, adoption, retention, renewals, and expansions — for enterprise and mid-market SaaS portfolios. Skilled in churn prevention, account planning, and maximizing Customer Lifetime Value through measurable outcomes and long-term partnerships.

AI & Product Exploration: Hands-on experience experimenting with AI tools and building lightweight prototypes using the Claude API. Familiar with prompt engineering, LLM-powered workflows, and how AI can automate repetitive CS tasks like QBR preparation and competitive research. Comfortable exploring tools like React and Python at a functional level to better collaborate with engineering teams.

Technical & SaaS Tools: Proficient in Salesforce, HubSpot, Zoho CRM, JIRA, NetSuite, Google Analytics, and customer health dashboards. Comfortable working alongside AI and engineering teams to scope requirements, test workflows, and provide customer-informed feedback on product features.

Customer Enablement & Community: Experienced in building customer communities, developing advocates, and delivering workshops, training, and playbooks that drive engagement, adoption, and platform stickiness. Strong background in digital marketing and brand-aligned communication.

Data, Performance & Strategy: Skilled in QBRs, ROI analysis, and translating customer data into strategic recommendations. Familiar with product discovery practices including feature prioritization, user story writing, and Voice of Customer analysis — applied through PM coursework and day-to-day CS work.

Collaboration & Leadership: Trusted advisor to enterprise stakeholders with strong executive communication and consultative selling skills. Proven at collaborating cross-functionally with Product, Engineering, Marketing, and Sales to influence roadmap decisions and drive customer satisfaction.

AI PRODUCT DEVELOPMENT & PROJECTS

Self-directed exploration of AI-powered tools : designed and built personal projects using LLM APIs and modern frameworks to solve real customer success and business problems. All projects available on GitHub (github.com/cloudbyharsh).

HospitalityIQ — AI Competitive Intelligence Tool | *React, Claude API, Vercel* | 2024–Present

- Built a web application that uses Claude to analyze hospitality businesses, surface nearby competitors, and generate competitive analysis reports with SEO and visibility recommendations.
- Connected the Anthropic Claude API with web search to pull live market data; deployed on Vercel. Experimented with prompt design to keep per-report API costs in the $1–3 range.

CS-Automation — QBR/MBR Scheduling Tool | *Node.js, Microsoft Graph API* | 2024–Present

- Identified a recurring pain point in CS workflows — the manual effort of scheduling and tracking QBRs — and built a lightweight automation tool to manage meeting scheduling for CSM teams.
- Used Microsoft Graph API for calendar integration, automated email reminders, and a simple dashboard for tracking client meeting status.

Claude-SEO — SEO Analysis Skill for Claude | *Python, Claude API* | 2024–Present

- Built and open-sourced modular SEO analysis tool designed as a Claude skill, covering areas like technical SEO, content quality, Core Web Vitals, and schema markup.

- Explored integrations with SEO data sources (Ahrefs, SEMrush, Google Search Console) to bring real data into AI-generated audit reports.

PROFESSIONAL EXPERIENCE

Customer Success Manager
March 2024 – Present

Milestone Inc. | Toronto, ON, Canada

- Own full lifecycle management for enterprise SaaS clients across an $800K+ portfolio, driving renewals, upsells, and expansion through AI-driven engagement and digital marketing platforms.
- Serve as a trusted advisor to global brands, aligning platform capabilities with social engagement, brand protection, and automation goals.
- Deliver executive-level Quarterly Business Reviews analyzing performance data, engagement metrics, and automation efficiency to demonstrate ROI and surface growth opportunities.
- Maintained 0% churn across the portfolio for the second consecutive year, with all clients renewing their agreements — building on a 3-year streak of zero logo churn across both Milestone entities.
- Grew and retained a hotel management group account from 3 to 7 properties over the engagement, culminating in a full portfolio renewal in Q4 2025 — including new websites and expanded feature adoption across all 7 hotels.
- Collaborate with Product, Engineering, and AI teams to relay client-specific feedback, helping shape model fine-tuning, workflow improvements, and feature prioritization.
- Built customer advocacy programs that generated testimonials, case studies, and references, supporting enterprise sales cycles and increasing Customer Lifetime Value.
- Led enablement workshops driving feature adoption, community engagement, and scalable customer outcomes.

Customer Success Manager
March 2023 – February 2024

Milestone Internet Pvt Ltd | Ahmedabad, India

- Managed 40+ enterprise and mid-market B2B SaaS accounts with a focus on renewals, retention, and expansion revenue.
- Achieved 0% churn across all managed accounts with every client renewing their agreement , contributing to a 3-year **zero logo churn** record spanning both Milestone roles.
- Reduced time to value by 20% through standardized onboarding, adoption plans, and customer success playbooks.
- Drove 35% year-over-year expansion revenue by partnering with Sales and Product on upsell and cross-sell strategies.
- Delivered executive business reviews translating performance and automation data into strategic recommendations that improved satisfaction and ROI.
- Identified and developed customer advocates to support testimonials, case studies, and sales references.

Customer Success Manager
November 2020 – February 2023

ADIT Tech Pvt Ltd | Ahmedabad, India

- Supported 150+ SaaS clients across enterprise and mid-market segments, driving platform adoption, engagement, and long-term retention.
- Reduced churn by 18% year-over-year through data-driven engagement, proactive outreach, and targeted reactivation campaigns.
- Reduced time to value by 35% through scalable onboarding processes and structured enablement programs.
- Served as Product Specialist for a core engagement module , drove adoption-led growth that contributed to MRR growing from $60K to $1.8M over the role tenure.
- Collaborated with Product and Engineering to surface Voice of Customer insights and deliver feature enhancements aligned to real client needs.
- Conducted strategic workshops with executive stakeholders to align product usage with marketing, community management, and business goals.

Senior Executive, Customer Operations
September 2017 – October 2020

VOIS (Vodafone Group) | Ahmedabad, India

- Provided enterprise client support across high-volume regulated European markets, maintaining strong satisfaction, brand protection, and service quality standards.

- Ranked as a top performer across 8 consecutive quarters based on first-contact resolution and customer satisfaction scores.
- Developed expertise in escalation management, consultative communication, and enterprise stakeholder engagement.
